

Tuller, along with other MIT colleagues: Professors Carl V. Thompson, Yang Shao-Horn, Yet-Ming Chiang, Alexie Kolpak, Paula Hammond, Christopher Cummins and Craig Carter, embark on new collaborations with Russian colleagues from the Skolkovo Institute of Science and Technology and Moscow State University. Of the several "thrusts" or research areas in the newly established **Center of Electrochemical Energy**, Tuller's focus will be on **Fuel and Electrolysis Cells for Efficient Energy Conversion and Storage.**
